EDUCATION

Institute of Technology of Cambodia

Engineering in Computer Science
2023 – 2027

High School

2020 – 2022

SKILLS

DevOps & Cloud

- Docker, Jenkins (Basic), GitHub Actions, AWS EC2, Nginx, Linux (Ubuntu), SSL/TLS Configuration

CI/CD & Automation

- CI/CD Pipelines, Deployment Automation, Git & GitHub

CI/CD & Automation

- Backend & Frontend, Spring Boot, Java, Vue.js, NestJS

Databases

- MongoDB Atlas, MySQL

LANGUAGE

- Khmer
- English

SUMMARY

Computer Science student passionate about DevOps, cloud infrastructure, and CI/CD automation. Experienced with Docker, AWS EC2, Jenkins, GitHub Actions, Nginx, and Linux through hands-on deployment projects. Interested in cloud deployment, infrastructure automation, and scalable application systems.

PROJECTS

Portfolio Website Deployment Automation

Tech Stack: Vue.js, Docker, Jenkins, AWS EC2, Ansible, Nginx, GitHub, SSL/TLS

- Developed and deployed a portfolio website using Vue.js
- Containerized the application using Docker
- Configured Jenkins CI/CD pipeline for automated build and deployment
- Automated deployment and server configuration using Ansible playbooks
- Deployed application to AWS EC2 Ubuntu server
- Configured Nginx as a reverse proxy
- Secured the website using HTTPS with SSL/TLS
- Configured DNS for domain and subdomain routing
- Managed source code and deployment workflow using GitHub

E-Commerce (School Supply) Application Deployment

Tech Stack: Spring Boot, Vue.js, Docker, GitHub Actions, AWS EC2, MongoDB Atlas, Nginx

- Developed a full-stack e-commerce platform for school supply products
- Implemented CI/CD pipeline using GitHub Actions / Jenkins
- Containerized frontend and backend using Docker
- Deployed application to AWS EC2 Ubuntu server
- Configured Nginx reverse proxy and HTTPS with SSL/TLS
- Integrated MongoDB Atlas cloud database
- Configured DNS for domain and subdomain routing
- Managed version control and collaboration using GitHub

C2C Material Exchange Platform (Team Project)

Tech Stack: Vue.js, NestJS, MongoDB Atlas, Cloudflare

- Developed a C2C platform for buying, selling, borrowing, and exchanging materials in a team environment
- Contributed to backend API development using NestJS
- Implemented frontend features using Vue.js
- Integrated MongoDB Atlas cloud database
- Assisted in deployment and hosting using Cloudflare
- Collaborated using GitHub (branches, pull requests, version control)
