EDUCATION

Institute of Technology of Cambodia

Engineering in Computer Science
2023 – 2027

High School

2020 – 2022

SKILLS

DevOps & Cloud

- Docker, Jenkins (Basic), GitHub Actions, AWS EC2, Nginx, Linux (Ubuntu), SSL/TLS Configuration, Load Balancing, Kubernetes

CI/CD & Automation

- CI/CD Pipelines, Deployment Automation, Git & GitHub

Backend & Frontend,

- Java(Spring Boot), Vue.js, NestJS, Laravel

Databases

- MongoDB, MySQL

LANGUAGE

- Khmer
- English

SUMMARY

I am a year 4 students of Institute of Technology of Cambodia (ITC) majoring in Computer Science and Engineering. I have a strong passion for technology and programming, and I am constantly seeking to expand my knowledge and skills in the field of DevOps Engineer.

PROJECTS

Portfolio Website Deployment Automation

05/2026 – Present

Tech Stack: Vue.js, Docker, Jenkins, AWS EC2, Ansible, Nginx, GitHub, SSL/TLS

- Developed and deployed a portfolio website using Vue.js
- Containerized the application using Docker
- Configured Jenkins CI/CD pipeline for automated build and deployment
- Automated deployment and server configuration using Ansible playbooks
- Deployed application to AWS EC2 Ubuntu server
- Configured Nginx as a reverse proxy
- Secured the website using HTTPS with SSL/TLS
- Configured DNS for domain and subdomain routing
- Managed source code and deployment workflow using GitHub

C2C Material Exchange Platform (Team Project)

03/2026 – 06/2026

Tech Stack: Vue.js, NestJS, MongoDB Atlas, Cloudflare, Render

- Developed a C2C platform for user to buying, selling, borrowing, and exchanging materials
- Contributed to backend API development using NestJS
- Implemented frontend features using Vue.js
- Integrated MongoDB Atlas cloud database
- Assisted in deployment and hosting using Cloudflare and Render
- Collaborated using GitHub (branches, pull requests, version control)

E-Commerce (School Supply) Application Deployment

11/2025 – 01/2026

Tech Stack: Spring Boot, Vue.js, Docker, GitHub Actions, AWS EC2, MongoDB Atlas, Nginx

- Developed a full-stack e-commerce platform for school supply products
- Implemented CI/CD pipeline using GitHub Actions / Jenkins
- Containerized frontend and backend using Docker
- Deployed application to AWS EC2 Ubuntu server
- Configured Nginx reverse proxy and HTTPS with SSL/TLS
- Integrated MongoDB Atlas cloud database
- Configured DNS for domain and subdomain routing
- Managed version control and collaboration using GitHub
